Requirement Analysis

Data Flow Diagram & User Stories

Date	November 2026
Student Name	Rachabathula Gnana Sruthi
Project Name	Automated Network Request Management
Maximum Marks	

Logical Data Flow

Step	Flow
1	Requester opens Service Portal (/sp).
2	Selects Network Request catalog item widget.
3	Widget redirects to Record Producer form.
4	Requester enters network parameters (IP, port, device type, justification).
5	Catalog UI Policies dynamically validate and toggle relevant fields.
6	Record Producer creates backend record in custom table (u_network_requests).
7	Flow Designer triggers approval routing and fulfillment tasks.
