Requirement Analysis

Solution Requirements (Functional & Non-functional)

Date	November 2026
Student Name	Rachabathula Gnana Sruthi
Project Name	Automated Network Request Management
Maximum Marks	

Functional Requirements

FR No.	Functional Requirement (Epic)	Sub Requirement
FR-1	Application & Data Model	Custom scoped application and u_network_requests database table.
FR-2	Request Capture	Request Number, Requester, Network Type, IP Address, Port Number, Priority, State, Assignment Group.
FR-3	Validation	Mandatory network parameter validation when State is New; Number field is read-only.
FR-4	Dependent Choices	Sub-options and technical fields dynamically depend on selected network request category.
FR-5	Catalog	Network Request Record Producer with mapped variable sets.
FR-6	Portal	Service Portal (/sp) and custom network widgets.
FR-7	Navigation	Service Portal network request widget opens Record Producer directly.
FR-8	Testing	Validate portal form submission, UI policies, and backend record creation.

Non-functional Requirements

NFR	Requirement	Description
NFR-1	Usability	Clear, intuitive service portal navigation for network requesters.
NFR-2	Security	ServiceNow ACLs and scoped application security controls.
NFR-3	Reliability	Flow Designer and UI Policies consistently enforce business logic and routing.
NFR-4	Performance	Rapid interactive response times across portal form submissions.
NFR-5	Availability	High availability backed by the ServiceNow instance infrastructure.
NFR-6	Scalability	Easily extendable with automated approvals, notifications, and analytics reports.

Automated Network Request Management — Solution Requirements — Functional Coverage

FR-1	**Application setup**	Network Request scoped application in ServiceNow
FR-2	**Network request record**	Custom table with auto-number and audit-ready tracking
FR-3	**Data capture**	Requester, Network Type, Subnet / VLAN, Device, Short Description, State, Priority, Assignment Group
FR-4	**Controlled choices**	Network parameters depend on Network Type
FR-5	**Validation**	Short Description mandatory when State is New, automated validation of IP, subnet and required parameters
FR-6	**Record integrity**	Number is read-only, change history is audit-ready
FR-7	**Catalog**	Request Network Service catalog item with mapped variables and automated routing
FR-8	**Portal**	ServiceNow Portal and Employee Center homepage
FR-9	**Navigation**	Network Request widget opens Record Producer and triggers Flow Designer automation
FR-10	**Testing**	Validate portal, form, validation, routing and automated fulfillment
