Problem–Solution Fit

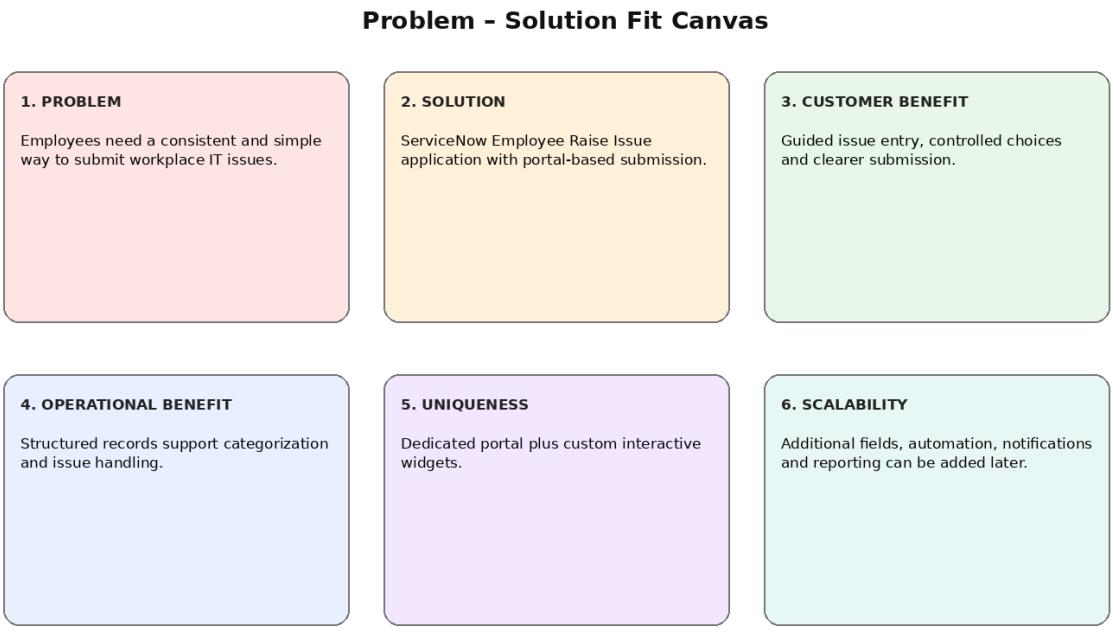

Figure 1: Problem–solution fit canvas adapted to the Employee Raise Issue project.

Parameter	Project Fit
Problem	Requesters need a consistent, structured way to submit network service and port access requests.
Solution	Automated Network Request Management application on ServiceNow with portal-based submission and Flow Designer.
Customer Benefit	Guided catalog items, fast validation, and clear status tracking.
Operational Benefit	Structured backend network records support rapid routing and audit-ready tracking.
Uniqueness	Combines ServiceNow scoped application with custom portal widgets and automated approval flows.
Scalability	Additional network types, automated notifications, and reporting dashboards can be easily added.
